- keep following signs for 395 N into the city. Once you cross the Potomac, the road will curve to the right. Keep following signs for 395N.

- this will lead you into the first of two tunnels. Keep following the signs for 395.

- stay on the right side as you come out

- from here you will follow signs for New York Avenue

- this will lead into the second tunnel

Stay in the middle-to-left of the road. As you emerge into daylight, you will see the road split. You want to be on the left-hand side, 95/Baltimore:

Keep following signs for NY Ave. As you turn onto New York Avenue, get into the right lane.

You will make a right onto M street in just a block or two (the road branching off to the right in this next photo):

Follow M Street a couple of blocks to this intersection. Turn left onto North Capitol:

Follow North Capitol for a few blocks. By the time you see an Exxon station on your right, you will want to be in the right lane. The road at the Exxon intersection is Florida; you want to cross it. But Q Street is *immediately* after Florida -- it is between the red-roofed pizza business and the brown rowhouse in this next photo. Make a right onto Q. That's our block.
